

Geometry Assurance Words

These are the “key” math vocabulary words that Geometry students need to have mastery of (grade level appropriate) by the end of their year in Geometry.

| | |
|----|--------------------------------------------|
| 1 | Adjacent |
| 2 | Altitude |
| 3 | Angle of Elevation/Depression |
| 4 | Apothem |
| 5 | Bisectors (Perpendicular and Angle) |
| 6 | Central Angle |
| 7 | Chord |
| 8 | Collinear / Non-collinear |
| 9 | Congruent |
| 10 | Coplanar / Non-coplanar |
| 11 | Distance |
| 12 | Height vs Slant Height |
| 13 | Isosceles Triangle |
| 14 | Linear Pair |
| 15 | Median |
| 16 | Net |
| 17 | Parallel and Perpendicular |
| 18 | Pi (exact) |
| 19 | Plane |
| 20 | Pythagorean Theorem and Triples |
| 21 | Regular Polygon |
| 22 | Scale Factor |
| 23 | Similar |
| 24 | Skew |
| 25 | Special Right Triangles (and their parts) |
| 26 | Surface Area |
| 27 | Transformations |
| 28 | Transversal/Angles Created by Transversals |
| 29 | Trig Ratios (Sin, Cos, Tan) |
| 30 | Vertical Angle |
| 31 | Volume |
