

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

1	For at least 40% of instructional time, conducts field and laboratory investigations using safe, environmentally appropriate, and ethical practices. investigations.
1A Tested	Demonstrate safe practices during field and laboratory investigations. Such as: <ul style="list-style-type: none"> • Use of safety glasses in projectile motion experiments • Proper operation of lasers in optics experiments • Proper handling of electrical equipment
1B Not Tested	Make wise choices in the use and conservation of resources and the disposal or recycling of materials.
2	Uses scientific methods during fields & laboratory investigations.
2A Tested	Plan and implement investigative procedures including asking questions, formulating testable hypotheses, and selecting equipment and technology. --- Design experimental methods to verify theories Including: <ul style="list-style-type: none"> • Equipment needed • Data to be taken • Data analysis required
2B Tested	Make quantitative observations and measurements with precision. --- Appropriate use of measuring tools Such as: <ul style="list-style-type: none"> • Zeroing/calibrating instruments • Differentiate between accuracy and precision
2C Tested	Organize, analyze, evaluate, make inferences, and predict trends from data. --- Organize data in a meaningful form Such as: <ul style="list-style-type: none"> • Data tables --- Identify appropriate data analysis techniques Such as: <ul style="list-style-type: none"> • Graphical representations • Mathematical functions to fit data
2D Tested	Communicate valid conclusions. --- Summarize data trends --- Evaluate data quality & error sources --- Error analysis Such as: <ul style="list-style-type: none"> • Percent error • Absolute error --- Use results to validate/invalidate theory
2E	Graph data to observe and identify relationships between variables. --- Appropriate graphical representations of data Including: <ul style="list-style-type: none"> • Organization of axes • Determine significance of slope • Recognize data relationships Such as: <ul style="list-style-type: none"> ○ Linear ○ Exponential ○ Polynomial ○ Inversely proportional

Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

3	Uses critical thinking and scientific problem solving to make informed decisions.
3A Tested	Analyze, review, and critique scientific explanations, including hypotheses and theories, as to their strengths and weaknesses using scientific evidence and information. --- Accept/reject statements strictly based upon scientific evidence Such as: <ul style="list-style-type: none"> • Experimental results • Develop valid/testable hypotheses • Making valid extensions of accepted existent theories
3B Tested	Express laws symbolically and employ mathematical procedures including vector addition and right-triangle geometry to solve physical problems. Including --- Understand mathematical functions as representations of laws of physics --- Manipulate physics equations to solve for variables Such as: <ul style="list-style-type: none"> • Algebraic operations • Identifying and isolating variables in equations --- Dimensional Analysis --- Right-triangle geometry Including: <ul style="list-style-type: none"> • Pythagorean theorem • Trigonometric functions & relationships --- Vector representation of physical quantities --- Vector components --- Vector mathematical operations Including: <ul style="list-style-type: none"> • Adding and subtracting vectors (graphical & analytical) Such as: <ul style="list-style-type: none"> ○ 2-D displacements ○ Velocity vectors for objects being the subject of two different motions.
3C Not Tested	Evaluate the impact of research on scientific thought, society, and the environment. --- Relate physics to current topics Such as: <ul style="list-style-type: none"> • Climate change • Perpetual motion machines • Energy Resources & Conservation
3D Not Tested	Describe connection between physics and future careers. Such as: <ul style="list-style-type: none"> • Engineering • Medical technology • Sports
3E Not Tested	Research and describe the history of physics and contributions of scientists. Including: <ul style="list-style-type: none"> • Mechanics (Aristotle, Galileo, Newton) • Heat (Rumford, Kelvin, Clausius, Joule) • Electricity/Magnetism (Franklin, Coulomb, Faraday, Ohm, Ampere, Oerstad) • Atomic model (Thomson, Rutherford, Bohr) • Modern (Planck, Einstein, Schroedinger, Heisenberg)

KEY: Blue Font in Yellow Box – Knowledge/Skills Statement; Green Box – TAKS Tested Student Expectation; Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

4	The student knows the laws governing motion.
4A Tested	<p>Generate and interpret graphs describing motion including the use of real-time technology</p> <p>--- Explain the information on graphs</p> <ul style="list-style-type: none"> • Position-time • Velocity-time • Acceleration-time <p>--- Real-time technology</p> <p>Such as:</p> <ul style="list-style-type: none"> • Motion detectors • Photogates
4B Tested	<p>Analyze examples of uniform and accelerated motion. Including</p> <p>--- Linear</p> <ul style="list-style-type: none"> • Solve displacement problems • Solve velocity problems • Solve acceleration problems involving uniform acceleration and free fall <p>--- Projectile</p> <ul style="list-style-type: none"> • Resolving 2-D motion into independent motions • Flat projectiles <p>Including:</p> <ul style="list-style-type: none"> ○ Range ○ Time of flight <ul style="list-style-type: none"> • Angled projectiles <p>Including:</p> <ul style="list-style-type: none"> ○ Relation between range and angle of projection <p>Such as:</p> <ul style="list-style-type: none"> ○ Determine range, time of flight, and maximum height <p>--- Circular (uniform)</p> <p>--- Characteristics of circular motion</p> <p>Including:</p> <ul style="list-style-type: none"> • Period • Radius • Frequency • Centripetal acceleration
4C Tested	<p>Demonstrate the effects of forces on the motion of objects.</p> <p>Including</p> <ul style="list-style-type: none"> • Differentiate between mass and weight • Identify mass as a measure of inertia • Solve problems involving force, mass and acceleration <ul style="list-style-type: none"> • Forces on a single object • Situations involving friction • Objects on inclined planes <p>--- Interpret real life situations using Newton’s 3rd Law</p> <p>Including:</p> <ul style="list-style-type: none"> • Action and reaction forces <p>Such as:</p> <ul style="list-style-type: none"> • Pairs of forces • Weight and normal force • Weight and tension

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

4D Not Tested	Develop and interpret a free-body diagram for force analysis. Including <ul style="list-style-type: none">• Represent interactions between objects through free-body diagrams
4E Tested	Identify and describe motion relative to different frames of reference. Including <ul style="list-style-type: none">• Analyze motion with respect to a specified origin• Analyze motion with respect to objects moving with constant velocity.

KEY: Blue Font in Yellow Box – Knowledge/Skills Statement; Green Box – TAKS Tested Student Expectation;
Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

5	The student knows that changes occur within a physical system and recognizes that energy and momentum are conserved.
5A Not Tested	Interpret evidence for the work-energy theorem. Including <ul style="list-style-type: none"> • Relate work to energy changes • Applying work-energy theorem in problems involving conservative and non-conservative forces.
5B Not Tested	Observe and describe examples of kinetic and potential energy and their transformations. Including <ul style="list-style-type: none"> • Classify energy forms according to their dependence <ul style="list-style-type: none"> ○ Gravitational potential energy – height ○ Kinetic energy – velocity ○ Thermal energy – temperature ○ Elastic potential energy – stretch ○ Electric potential energy – distance --- Describe conversion of forms of mechanical energy in different systems Such as <ul style="list-style-type: none"> • falling bodies • roller coasters • pendulums
5C Tested	Calculate the mechanical energy and momentum in a physical system. Such as <ul style="list-style-type: none"> • Billiards • Cars • Trains --- Solve problems involving conservation and calculation of mechanical energy. --- Calculate velocities in elastic and inelastic collisions.
5D Tested	Demonstrate the conservation of energy and momentum. Including <ul style="list-style-type: none"> • Equate impulse to the change in momentum • Appreciate the importance of impulse and momentum in daily situations <ul style="list-style-type: none"> ○ Protection in car accidents <ul style="list-style-type: none"> ▪ Seat belts ▪ Air bags ▪ Crumple zones ▪ Collapsible barriers ○ Sports <ul style="list-style-type: none"> ▪ Collisions in football ▪ Collisions in auto racing ▪ Baseball ▪ Tennis • Solve problems involving impulse and change of momentum. • Explain the law of conservation of momentum. • Solve problems involving the law of conservation of momentum. • Explain the law of conservation of energy • Solve problems involving conservation of energy • Observe the law of conservation of momentum in elastic and inelastic collisions Such as: <ul style="list-style-type: none"> ○ Explosions ○ Collisions between carts

KEY: Blue Font in Yellow Box – Knowledge/Skills Statement; Green Box – TAKS Tested Student Expectation; Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

6	The student knows forces in nature.
6A Not Tested	Identify the influence of mass and distance on gravitational forces. Including <ul style="list-style-type: none"> • Describe the law of universal gravitation. • Calculate the amount of gravitational force between two objects. • Determine the strength of a gravitational field.
6B Not Tested	Research and describe the historical development of the concepts of gravitational, electrical, and magnetic force. Including <ul style="list-style-type: none"> • Trace the historical progression of thought regarding gravity. <ul style="list-style-type: none"> ○ Newton ○ Cavendish ○ Einstein • Trace the history of our understanding of electricity and magnetism. <ul style="list-style-type: none"> ○ Coulomb ○ Faraday ○ Maxwell
6C Tested	Identify and analyze the influences of charge and distance on electric forces. Including <ul style="list-style-type: none"> • Solve problems involving Coulomb’s law. • Solve electric field intensity problems. • Describe charging by induction. • Quantify charge as integer multiple of elementary charges. • Explain electric potential difference. • Describe the properties of electric fields. • Describe the effects of electric fields on charges. • Describe electric fields in conductors.
6D Not Tested	Demonstrate the relationship between electricity and magnetism. Including <ul style="list-style-type: none"> • Describe magnetic field lines. • Describe the flow of magnetic field through a surface as flux • Explain Faraday’s law of induction. • Determine the direction of induced current using Lenz’s law. • Explain why a rotating loop in a magnetic field produces alternating current.
6E Tested	Design and analyze electric circuits. Including <ul style="list-style-type: none"> • Build and diagram series and parallel circuits • Define electric current and resistance • Use Ohm’s law to solve and simplify (reduce) circuits
6F Not Tested	Identify examples of electrical and magnetic forces in everyday life. Including <ul style="list-style-type: none"> • Solve problems involving electric power consumption. • Compare & contrast the current and voltage in the wires in a long distance transmission line and the wires that carry electricity to a home. • Describe everyday applications <ul style="list-style-type: none"> Such as <ul style="list-style-type: none"> ○ Electric motors ○ MRI ○ Cat Scan ○ Aurora Borealis/Australis

KEY: Blue Font in Yellow Box – Knowledge/Skills Statement; Green Box – TAKS Tested Student Expectation; Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

7	The student knows the laws of Thermodynamics.
7A Tested	<p>Analyze and explain everyday examples that illustrate the laws of thermodynamics.</p> <p>Including</p> <ul style="list-style-type: none"> • Heat engines & efficiency • Describe the role of heat in phase changes • Explain thermal expansion in examples such as bridges, metallic structures of buildings, railroad tracks. • Compare and contrast alternative heating methods <ul style="list-style-type: none"> Such as <ul style="list-style-type: none"> ○ Heat pumps ○ Air conditioning ○ Radiant heating ○ Solar ○ Geothermal
7B Tested	<p>Evaluate different methods of heat energy transfer that result in an increasing amount of disorder.</p> <p>Including</p> <ul style="list-style-type: none"> • Describe entropy as a measure of the degree of order/disorder • Explain the relationship between internal energy, heat, and work. • Convection, conduction, radiation • Define heat in terms of molecular motion. • Describe the concept of thermal equilibrium. • Explain the importance of specific heat. • Describe the relationship between heat energy and entropy as it relates to a system and its surroundings.

KEY: Blue Font in Yellow Box – Knowledge/Skills Statement; Green Box – TAKS Tested Student Expectation; Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

8	The student knows the characteristics and behavior of waves.
8A Tested	<p>Examine and describe a variety of waves propagated in various types of media and describe wave characteristics</p> <p>Such as</p> <ul style="list-style-type: none"> • Describe the properties of oscillation / simple harmonic motion • Describe factors that affect the period of a simple pendulum and spring-mass system • Describe pulses and periodic waves • Describe characteristics of waves <ul style="list-style-type: none"> ○ Velocity ○ Frequency ○ Wavelength ○ Amplitude ○ Crest/compression ○ Trough/rarefaction • Describe the two types of waves <ul style="list-style-type: none"> ○ Transverse ○ Longitudinal • Describe wave behaviors Such as <ul style="list-style-type: none"> ○ Reflection (fixed & loose end) ○ Refraction ○ Interference (including constructive & destructive) ○ Diffraction ○ Polarization • Describe standing waves and how they are formed
8B Tested	<p>Identify the characteristics and behaviors of sound and electromagnetic waves.</p> <p>Including</p> <ul style="list-style-type: none"> • Explain how sound waves are produced • Describe properties of sound waves <ul style="list-style-type: none"> Including <ul style="list-style-type: none"> ○ Intensity & relative intensity ○ Frequency & pitch (including beats) ○ Harmonics – quality & timbre (including standing waves w/ stringed and pipe instruments) ○ Resonance ○ The Doppler effect • Extend general properties & behaviors of waves to electromagnetic waves <ul style="list-style-type: none"> Including: <ul style="list-style-type: none"> ○ reflection <ul style="list-style-type: none"> ▪ mirrors ○ refraction <ul style="list-style-type: none"> ▪ Snell’s Law ▪ total internal reflection & critical angle ▪ lenses
8C Tested	<p>Interpret the role of wave characteristics and behaviors found in medicinal (medical) and industrial applications.</p> <p>Including</p> <ul style="list-style-type: none"> • Ultrasound (sonograms) • Doppler weather • Police radar • Sonar/Echolocation • Radio/TV communications

KEY: Blue Font in Yellow Box – Knowledge/Skills Statement; Green Box – TAKS Tested Student Expectation; Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.

PISD Curriculum – Vertical Alignment of Science TEKS

High School – Physics

9	The student knows simple examples of quantum physics.
9A Not Tested	Describe the photoelectric effect. Including <ul style="list-style-type: none">• Relations between:<ul style="list-style-type: none">○ Intensity / number of photons & photoelectric current○ Frequency & kinetic energy of electrons○ Threshold frequency & work function
9B Not Tested	Explain the line spectra from different gas-discharge tubes. Including <ul style="list-style-type: none">• Identify gases by their spectra• Relate line spectrum to atomic models (including Bohr's model)

KEY: Blue Font in Yellow Box – Knowledge/Skills Statement; Green Box – TAKS Tested Student Expectation; Red Font – Additional PISD “Such as” and “Including” Statements; Blue Font – Teacher Note.
